SunRise Systems & Solutions
PO Box 2706
East Liverpool, OH 43920

To Whom It May Concern:

In 1988, I first introduced computers into my chiropractic office. The software I chose seemed good and reasonably priced. This company promised "many things". However, as time went on, these so-called "things", came at an ever increasing cost, while support seemed to go down hill. Both my staff and I were becoming more frustrated at not getting the necessary help we needed.

In 2006, SunRise Practice Management Software was brought to my attention by a fellow colleague. Though very hesitant to change, due to our large number of patient files and the difficulty I envisioned with such transitions, I still decided to give you a try.

Over the past months, we here in the office have been very pleased with this program, and consider it the best medical program we have used in the office. The technical support alone has restored our faith in company promises being upheld. Your tech seems to always be there willing to help, and even encouraging us to call with even the most mundane problems. Your dedication and personal interest in us, not only as a company using your software, but your compassion for us as human beings made it feel as if we had become instant friends.

This letter represents a small portion of our thanks and appreciation for SunRise Systems & Solutions and its staff. I will, at any opportunity which presents itself, highly recommend your company as the top quality organization I feel you are.

Sincerely

A handwritten signature in black ink, appearing to read "T. F. Thomas", with a long, sweeping horizontal line extending to the right.
